Project: Air Tanker Offices and Deck Car Park
Client: Barnwood Construction
Tonnage: Circa 200 Tonnes
Location: Carterton, Oxfordshire

SSF were involved in a two new elements for AirTanker – a new 20,086 sq ft office block and 22,000 sq ft decked car park near RAF Brize Norton in Oxfordshire. AirTanker supplies the RAF with delivering strategic air to air refuelling while out on operations worldwide.

SSF's brief was to undertake a design and build project to deliver both the new office space and car park at their site. The scope works included a full frame design on both elements of the build, fabrication and erection. The main office block was circa 120 T of steelwork and the Car Park was circa 80 T. The office block featured an intricate atrium area which required a lot of coordination between the design team. It also featured horizontal cladding throughout.

SSF also supplied, lifted and landed all concrete planks on the project as well as the stairs which fell under their package.
