Project: Manor Farm
Client: M C Hanlon
Tonnage: 25 Tonnes
Location: Bulbarrow

Manor Farm was the first project that was run under the new company 'SSF Small Works'. Manor Farm is built on an existing plot of land situated in the Dorset countryside with beautiful surroundings. It is eventually going to be used as an office block for local businesses.

The frame itself features a series of curved rafters with hollow section bracing between the rafters. The first floor utilised Kingspan cold rolled steel floor joists rather than the traditional timber joists. Kingspan also provided the cold rolled roof purlins in line with the client's requirements. The frame was braced with vertical flat bracing throughout the building. The building measured 26m x 6.5m x 6.5m high.
