Project: Thistle Hill School
Client: Galliford Try
Tonnage: 100 Tonnes
Location: Minster on Sea

This project involved the fabrication and erection of a new school to serve the brand new estate near Minster on Sea. The school comprises of two floors with a parapet running the full perimeter of the building.

Due to the pre-cast planks that we were to lift in, a large number of shear studs and angles were required and fitted.

The building was completed on time and to the satisfaction of the client.
