Project: My Place Paignton
Client: Interserve
Tonnage: 150 tonnes
Location: Torbay - Devon

This development involved the fabrication and erection of a new development for Torbay Council encompassing facilities for learning, and skill development including office space, residential and back packer accommodation. Outside there is a skate park and BMX track together with climbing wall and outdoor activities.

The building consists of a curved roof section with long span cellular beams and a more traditional pitch roof area which follows a skewed layout on plan. The exterior front and rear elevations have a curved canopy which follows a sweeping line along the length of the building. The structure was detailed including connection designs, fabricated and erected to the engineers details encompassing several details for secondary trades and thermal bridging considerations to all exposed steel.
