Project: Lidl / Dunelm Units
Client: Ashe Construction
Tonnage: 80 / 105 tonnes
Location: Reading Road, Basingstoke

This development involved the fabrication and erection of two new partnering industrial units on the outskirts of Basingstoke.

The itinerary for the project was to supply two stand alone portal frames which would provide an ultimately perfect space for the occupants. With a restrictive site layout adjacent to a live railway it proved a challenge to coordinate all operations however our highly professional site team enabled the erection of the frames efficiently and within all scheduled time scales.

The two frames totalled a 180 tonnes of steel, of which included various canopies over the main entrances and loading doors as well as large signage parapets which cover a gable end.
