Project: Tidworth Auditorium
Client: Aspire
Tonnage: 240 tonnes
Location: Tidworth Garrison

This development involved the fabrication and erection of the architectural auditorium for the ministry of defence.

The design brief for this project was to supply a contemporary yet sophisticated auditorium space suitable for the intended purposes of the build. We worked closely along side Aspire to achieve a fluent contract from start to finish.

Internally and externally the overall contract was performed to an extremely high standard, Westok cell rafters were one large cohesive factor to this bespoke frame all the way to the large glazed entrance which added to the modern signature.
