Project: Help For Heroes
Client: Interserve
Tonnage: 500 tonnes
Location: Devonport, Plymouth

This development funded by the forces charity Help For Heroes was divided into two phases. The £20m scheme first phase was to deliver an accommodation block for wounded soldiers, while the second phase focused on the construction of a state of the art rehabilitation facility at Devonport Naval base in Plymouth.

The design brief for the accommodation block was a large multi storey frame that included a curved canopy, while the rehabilitation centres main entrance and hydrotherapy pool were flanked by both the gymnasium and the six lane 25 metre swimming pool. The extensive pools restricted crane access and therefore required close communication between the site teams.
