Project: Butlins Activity Centre
Client: Amiri Construction
Tonnage: 325 tonnes
Location: Bognor Regis

Snashall Steel were appointed to provide the drawing, fabrication and erection of the new activity centre at Butlins' Bognor Regis resort. This new building named the "Playxperience" will add activities such as escape rooms, laser tag and digital darts to Butlins' already large selection of attractions. A considerable amount of collaboration went on between SSF, the cladders and Amiri to position and develop the cold rolled details required on the frame. As the canopy and stair cores were going to be installed at a later date, extensive forethought and planning needed to be carried out to make sure they were able to be installed practically and as simply as possible following the cladding installation.
